

ANZ Asian Investor Update

August 2012

**AUSTRALIA AND NEW ZEALAND
BANKING GROUP LIMITED**

**Graham Hodges, Deputy CEO
David Goode, Head of Debt IR**

ANZ released Q3 trading update on 17th August

Highlights

- YTD (9 months to end June) Underlying profit after tax¹ up 5.5% PCP
- YTD total Global Markets income up 2% to \$1.4b³ with market sales well up
- Group margins (ex Global Markets) stable⁴
- Provision coverage² at June 12 strong at 1.87%; collective provision coverage ratio 1.18%
- Year-to-date customer deposits have increased 8.7% with lending assets up 7.7% (FX adjusted)
- ANZ's APRA Basel III CET1 ratio at 30 June was 7.8% which equates to 9.8% on a fully harmonised basis
- FY12 term funding task was completed ahead of schedule

Underlying Profit

Common Equity Tier 1 Ratio (Jun 2012)

1. Underlying profit after tax is adjusted to reflect result for the ongoing business activities of the group

2. Total Provision coverage – CP balance plus IP balance as a proportion of Credit RWA's

3. FX adjusted

4. Comparison to 270 bps end of second quarter FY12

Key points from the ANZ Trading Update released 17th August for the 9 months to 30 June 2012

ANZ has continued to execute against its super regional strategy with a solid business performance despite headwinds from softer economic conditions.

In **Australia**, market share gains were achieved across household deposits, household lending and commercial. Divisional margins were up slightly despite the deposit pricing pressure. Credit quality remains sound with a reduction in 90 day mortgage arrears from the end of the half.

In **International & Institutional Banking (I&IB) Division***, the global institutional business is expected to deliver strong revenue growth YoY despite ongoing margin pressure in the loan book; customer deposits have fully funded the year to date division loan growth; the tenor of the deposit portfolio has lengthened (specifically in Australia and Asia/Pacific).

In **NZ****, the business' focus on simplification has positively impacted staff engagement, customer satisfaction and cost to income levels; year to date net loans and advances are up 1.4% with deposits up 6.9% and market share in retail has grown.

Asset quality has been in line with expectations :

- Total impaired assets were down \$117m in Q3 from Q2, new impaired assets also down QoQ
- Australian mortgage delinquencies continue to be tightly managed (reduction in 90 day mortgage arrears from the end of the half)
- Provision coverage remains strong (total provisions to Credit RWA's : 1.87%)
- Credit RWA growth is largely volume related

* IIB commentary is made on an FX adjusted basis

** Comparisons are NZ based

ANZ continues to organically pursue our Super Regional Strategy

ANZ Footprint in Asia

Highly diversified geographical footprint
across 16 Asian markets with 97 branches and
6 Partnerships

Rationale behind the Super Regional Strategy

1. Strategy aligned to Asian growth

- Strong domestic franchises and established market position
- Focus of expansion in higher growth Asian markets

2. Leveraging regional customer flows

- Aust/NZ flows to and from Asia – 8 of top 10 Australian export markets in Asia
- Network presence facilitating growing intra-Asia customer trade flows
- Differentiated growth opportunities in Aust / NZ

3. Strengthens balance sheet and earnings diversity

- Diversity of Group funding
- Self funded balance sheet in APEA
- Strong capital and liquidity positions
- Improves diversification of earnings by geography and product

Our Super Regional Strategy is built on three pillars

Diversification			Connectivity		
1. Revenue			1. Trade & Capital Flows		
a. Focus Markets					
• Indonesia	+17%	✓	• Trade	+25%	✓
• Singapore	+5%	x	• Cash Management	+19%	✓
• India	+71%	✓	• FX	+23%	✓
• Greater China	+24%	✓	• Capital Markets	+12%	✓
• Greater Mekong	+13%	✓			
b. Focus Sectors			2. Cross Border (Catch & Throw)		
• Natural Resources	+31%	✓	• % of Group Revenue	4%	✓
• Agribusiness	-3%	x			
• Infrastructure	+14%	✓			
• FIG	+26%	✓			
2. Funding (Term Debt Outstanding) ✓			3. Migrant Banking ✓		
• Domestic	34%		• Added 28 International Banking Services branches in Australia		
• Asia	14%		• Added additional language specialists		
• Europe & America	52%				
Shared Core Infrastructure					
Product	Operations	Risk	People		
• Transactive	• Hubs	• Markets and Credit Risk Engines	• Leadership development and training		
• FX	• Finnacle				
• Retail RMB					
• Go Money					

All growth rates reflect 1H12 v 1H11

ANZ's operations in Asia have an institutional focus with products linked to trade and capital flows

Revenue mix by product

Asia deposit & lending book

Revenue mix by customer segment

12 months rolling to Mar 12

Asia Commercial Loan book

* APEA division revenue mix (ex partnerships)

Customer Deposits have exceeded loans by \$41b since 2008

* Since Mar 08

LTD Gap

	Australia	APEA	New Zealand	Group
Sep 11 v Mar 12	(9)	4	2	(3)
Sep 08 v Mar 12	3	29	9	41

Lower structural funding gap - a growing competitive advantage

	ANZ	Peer 1	Peer 2	Peer 3
Loan – Deposit Ratio (%)	134	158	152	141
Loan – Deposit Gap (\$bn)	104	186	165	153
Australian Household Funding Gap (\$bn)	111	193	125	179
Short Term US Money Market Funding (US\$bn)	18	50	36	34

- ANZ has built a sustainable balance sheet
- Lower and more stable wholesale funding requirement relative to peers
- Lower reliance on offshore wholesale markets
- Better positioned to take advantage of any uptick in credit growth
- Mitigates Rating Agency pressures and improves capacity to manage through periods of market dislocation

Australian Household Funding Gap

Source: APRA and latest bank published financial statements at HY12.

ANZ's \$19bn FY12 wholesale debt issuance requirement has been completed. The forward maturity profile is well within manageable levels.

* Remaining FY12 maturities

ANZ's term funding portfolio is increasingly diversified with a declining reliance on offshore funding

Term Debt Issuance

Term Debt Outstandings

Continued strengthening of capital levels places ANZ in a strong position for upcoming Basel III implementation

Current capital levels are strong (Mar-12)

Well placed to meet Basel III CET1 target under APRA's draft capital standards

Liquid assets of \$99b exceed total offshore wholesale debt of \$85b

Strong liquidity position (\$b)

Composition of liquid assets (\$98.5b)

Provision Charge and Impaired Assets

**Total Provision Charge
(IP charge by Division, total CP charge)**

Gross Impaired Assets by Type

Australian Mortgages – robust structure results in low losses through the cycle

Portfolio Statistics

- 4. Economics**
- 5. Covered Bonds**

Balance Sheet

ANZ's group balance sheet has been strengthened significantly across all key metrics

Stronger Funding Composition (Mar-12 offshore CP ~\$15bn)

APRA CET1: increased by 3.6% (or > \$10b of additional equity)

Liquid assets increased significantly (\$bn)

ANZ has a well diversified funding profile with an increasing weighting to customer funding

Strong Funding Composition

Offshore short-term Commercial Paper makes up just 3% of total Group funding

Well diversified term wholesale funding portfolio

FY12 debt issuance is well ahead of plan; portfolio costs continue to increase

~80% FY12 term wholesale debt issuance completed

Portfolio term funding costs will continue to increase

1. As at 31 March 2012

The APEA balance sheet is self funded

The key aspects of the Super Regional Strategy from a balance sheet management perspective are:

- Much of our focus in the region is on providing **non lending products** (eg Cash, Trade, Rates, FX, DCM)
- Our Asian network enables us to **take Australian and NZ clients directly to the Asian debt capital markets** rather than bank loan funding
- We can also look to **provide Australian & NZ clients with diversified funding structures**, through assets written in Asia
- **Deposit pools are managed through our regional treasury centres** with the majority of APEA deposits in interchangeable currencies.

Asset quality

Economics

Key economic themes

There are challenges for the Australian economy

- Two-speed Australian economy remains in force, overall relatively strong growth
- The record terms of trade / mining investment boom is offsetting weakness in sectors such as tourism, manufacturing, retail and services
- The strong \$A and low levels of confidence are weighing on domestic demand
- Contagion from Europe is pushing up local credit costs. This is combining with the higher A\$ to tighten financial conditions
- Some modest increase in unemployment possible given the restructuring going on in the Australian economy
- Commodity prices to drift lower – the next phase of the commodity boom is more about volumes than prices
- RBA's challenge is to balance mining boom, structural change, fiscal tightening, consumer caution / deleveraging, while maintaining low inflation and low unemployment!

However, Australia is in a very strong position to confront these challenges

- Significant Policy ammunition available : both monetary and fiscal. Monetary policy is very effective given the predominance of variable rate borrowing by households
- Very strong government finances : strong AAA rating with very low government debt and expected budget surplus in 2013
- A strong (AA rated) and profitable banking sector
- Relatively limited direct trade and financial exposures to Europe
- stimulus from the resources boom and associated strong investment pipeline
- Population growth is re-accelerating

Australia remains in a very strong fiscal position

The Terms of Trade has driven the economy and resulted in strong income growth

Terms of trade since 1960

Income growth is continuing

GDP growth likely to move back to trend levels, driven largely by investment growth

Business investment vs. consumption

This investment spend is in the mining, energy and infrastructure sectors

Major infrastructure projects by industry

Major projects in mining and energy currently under way

The Australian economy is grappling with the structural change associated with this 2 speed economy

Employment growth by industry, 12 months to Feb 2012

Job ads by state reflect this structural adjustment

Ongoing caution in the Household sector has seen an improvement across most ratios

Household Debt Service Ratio

Household Debt to Income Ratio

Household Savings Ratio

- As a result of lower interest rates, the household debt service ratio has declined
- Household debt to income has remained broadly stable since 2006
- Household savings ratio has reverted back to long term averages after abnormally low levels over the past decade

Banks have become net repayers of offshore debt; Equity, government and corporates now fund the CAD

ANZ retains a positive view on China over the longer term

ANZ's view on China: Key themes

- As the Chinese economy grows and growth becomes more domestic orientated, we expect GDP growth rates to be 5 – 8% over the medium term rather than 7-10% which has been the case over the past 5 years.
- Consumption is likely to outperform on rising wages and tax reforms
- Investment growth will moderate but remains supported by public housing investment
- Inflation is key – monetary policy is expected to remain loose
- House prices are expected to continue to weaken and remain the weakest link in the Chinese economy
- Importantly, China's growth sustainability hinges on continued reform : enhanced flexibility of the RMB, interest rate liberalisation and an increased role for foreign and privately owned banks

China's growth is structural

2003 :
45 tier 1 – 3 cities

2025:
147 tier 1-3 cities

11 cities ~ 15 m

18 cities ~ 10 m

Source: BHP

What does a slowdown in China mean for Australia ?

- While a hard landing is not ANZ's base case and our forecast for GDP growth in 2012 is ~8%, it is worth considering what would happen in the event of a hard landing in China.
- The **IMF** has published research into various slowdown scenarios and the impact on Australia. The key findings are illustrated on this page :
 - Case 1 : China slowdown to 6%
 - Case 2 : Global GDP falls by 3%
- The IMF research shows that a global downturn has a larger impact on Australia (and other countries) than a China specific shock
- ANZ has also commissioned modelling work with results similar to the IMF study
- We would also highlight the following points :
 - If the Chinese government responds with fiscal stimulus then Australia benefits as stimulus is typically investment driven
 - The investment pipeline in Australia over the next 2 years is committed which will drive GDP growth over the next couple of years
 - In any China hard landing or global downturn, Australia has 3 key policy responses to stabilise the economy

Case 1 : China shock

Case 2 : Global downturn

In addition to fiscal policy, The Australian economy has 2 other policy adjustments to offset global shocks

Australian dollar vs. RBA cash rate

Covered Bonds

Australian Covered Bonds have a number of elements of structural support

- ✓ Dual recourse
- ✓ Legislative framework
- ✓ APRA regulated
- ✓ AAA rating
- ✓ Residential mortgage collateral
- ✓ Indexed for property price movements
- ✓ High level of transparency
- ✓ Issuer rating downgrade protection

Illustration of Supporting Collateral Portfolio

ANZ's Covered Bond Strategy

Rationale	Diversification of investor base • Access to AAA investor base - timely to assist in redemption of Government Guaranteed debt maturing from 2012 to 2014 • Reduces requirements for senior unsecured debt in offshore markets Lengthen funding profile in a cost effective manner
Metrics	Based on ANZ's balance sheet size and legislative requirements: • Cover pool limited to 8% of Australian assets • Provides capacity for ~\$20bn of Australian covered bond outstandings • ANZ's Australian residential mortgage portfolio currently ~\$180bn
Programme	ANZ has established a US\$20bn Australian covered bond programme • Multi-currency capability, however initial focus on EUR, USD and AUD • Panel of dealers appointed to promote liquidity • Indexing is applied to the value of the covered pool • Only Australian residential mortgages, no commercial mortgages
Expected Execution	Liquid yield curves established in AUD, EUR and USD via regular but not too frequent issuance • Issuance of ~\$5bn per annum (~25% of planned term debt issuance) • 1-2 transactions per year in each of EUR, USD and AUD markets • Focus on 5-10yr tenors for covered bonds, 2-5yr for senior unsecured

Australian Covered Bonds – Strong Character....

Structure	• Legislative framework comparable to UK ensures segregation of assets, limited eligibility criteria and oversight of programme • Dual recourse - a direct issue by ANZ and ring fenced collateral • Contractual arrangements provide further enhancements • Monthly Asset Coverage Test to ensure cover pool is sufficient • Ratings based triggers to ensure maintenance of collateral and liquidity
Ratings	• ANZ remained profitable through the global financial crisis • ANZ has stable issuer ratings of AA (S&P)/Aa2 (Moody's)/AA- (Fitch) • ANZ programme rated Aaa (Moody's)/ AAA (Fitch) • Significant leeway to maintain programme rating
Cover Pool	• ANZ programme restricted to Australian 1st ranking residential mortgages • Over-collateralisation (ANZ currently ~20%) • Residential portfolio demonstrates low losses through various cycles • Strong underwriting standards maintained in the market (no sub-prime) • High transparency with monthly reporting
Markets	• Supply from Australian issuers limited, expected to be ~\$130bn • Australian banks have issued in USD, Euro, AUD, GBP, CHF, NOK • Price curves developed across a range of maturities

Programme Structure

Programme Structural Enhancements

Collateral	• Prior to a Notice to Pay, the Asset Coverage Test used to ensure sufficient assets to support the value of outstanding covered bonds • After a Notice to Pay, the Amortisation Test to ensure sufficient cash to pay any maturing bonds
Indexation	• Value of assets are adjusted to reflect changes in the house price index • Indexing is applied using a similar procedure to UK programmes, with 100% of any loss and 85% of any gain applied • Housing Loans in arrears by more than 90 days receive zero value
Interest Rate Swap	• To hedge interest flows on the cover pool to cover the AUD payment obligations of the Trust • Provided by ANZ to the Trust
Covered Bond Swap	• To manage currency and/or interest basis risk • Provided by ANZ to Trust as a Forward Starting Covered Bond Swap
Ratings Triggers	• Purpose is to maintain credit quality of counterparties • Requires ANZ to post collateral for swaps and/or be replaced • Requires ANZ to provide liquidity to the Trust for redemptions and payments of interest • Potentially requires ANZ to replace itself as servicer and bank account

Cover Pool and the Demand Loan structure

- The Asset Coverage Test (“ACT”) is an ongoing test to ensure Adjusted Aggregate Receivable Amount (“AARA”) is equal to or greater than AUD equivalent of Covered Bonds outstanding
- The AARA is determined by applying a collateral “haircut” using the “Asset Percentage” which corresponds to the contractual minimum over-collateralisation
- The minimum AARA is for the benefit of bondholders and APRA has no rights with respect to this portion of the cover pool
- The cash equivalent of the excess AARA over the minimum AARA represents voluntary over-collateralisation, and is funded through the senior demand loan
- The senior demand loan can be called by the issuer, or if directed by APRA, for immediate repayment

Issuer Event of Default and Covered Bond Guarantee

Issuer Events of Default

Include:

- Default in principal or interest for 7 days
- Fail to perform obligations for 30 days
- Winding up, encumbrancer takes possession of all assets
- Bankruptcy proceedings
- An uncured breach of ACT

Following an Issuer Event of Default

- Service of an Issuer Acceleration Notice to the Issuer will accelerate claims against the Issuer but not the Guarantor. The bonds do not accelerate.
- Bondholders may immediately claim against the Issuer for the full Early Termination Amount and rank pari passu with ANZ's senior unsecured debt
- Any money obtained under that claim is paid to the Guarantor for payment on bonds as they fall due

Activation of the Covered Bond Guarantee

- Following an Issuer Acceleration Notice, the Trustee may serve a Notice to Pay on the Covered Bond Guarantor
- Investors receive payment of interest and principal under the Covered Bond Guarantee according to the original payment schedule as if no Issuer Event of Default had occurred
- To the extent the Covered Bond Guarantor has insufficient funds to repay in full Covered Bonds on the Maturity Date, the unpaid amount of Covered Bonds will be deferred and shall be due and payable 12 months later (or earlier if the CB Guarantor has sufficient funds). This provision does not apply to Hard Bullet Covered Bonds.

Covered Bond Pool : Composition and qualifying criteria

Portfolio Summary at 24-July-2012	
Covered Bond Pool	\$10,012m
Covered Bonds on issue	\$6,595m
Average loan size	\$277,063
Weighted Ave Current LVR	64.08%
Weighted Ave Indexed LVR	64.43%
Weighted Ave Seasoning	15.02 months
Min Required AP% / OC%	82.7% / 20.92%
Owner-Occupied / Investment	77.4% / 22.6%
Full-Doc loans	100%

Weighted Average Original/Current/Indexed LVR %

Qualifying Loan Criteria

- Due from a natural person resident of Australia
- Repayable in Australian Dollars
- Fully drawn
- Term does not exceed 30 years
- Current principal balance ≤ \$2,000,000
- Secured by a registered 1st mortgage
- Residential dwelling which is not under construction (excluding permitted renovations)
- The loan is not > 30 days in arrears
- The sale of the loan does not contravene or conflict with any applicable law
- The Borrower has made at least one interest payment on the loan
